PROJECTS

Wazuh SIEM Deployment and SSH Brute-Force Detection using Custom Rules

Home Lab

- Built a Wazuh home lab (Windows 10 OpenSSH target, Kali Linux attacker) with custom rules in `local_rules.xml` to correlate failed SSH logins by frequency/timeframe, mapped to MITRE ATT&CK T1110.

SSH Log Analyzer and Brute-Force Detection Script

Python Project

- Built a Python log analyzer using regex and sliding-window logic to flag SSH brute-force IPs above a configurable threshold; generated CSV reports and charts of top offenders with Pandas and Matplotlib.
